
1- CONTROLLER MOUNTED IN TRAY.
2- TOP ENTRY, ENCLOSURE
3- CONTROLLER OPTIONS.
4- POWER SWITCH/GFI RECEPTACLE.
5- TERMINAL STRIP.
6- 3/4" PVC CONDUIT FOR 120 VAC FROM METERED POWER SOURCE
7- PVC CONDUIT WITH SWEEP ELLS- FOR CONTROL WIRES, SIZE AS REQUIRED- 1-1/4" MINIMUM.
8- 1" PVC CONDUIT WITH SWEEP ELLS- FOR FLOW SENSOR CABLE-AEP 4516-2SP.
9- 3/4" PVC CONDUIT WITH SWEEP ELLS- #14 WIRES TO MASTER CONTROL VALVE.
10- 5/8"DIA. x 8' GROUND ROD W/ #10 GROUND WIRE & CLAMP.
11- FILL VOIDS WITH EXPANDABLE FOAM.
12- POURED CONCRETE BASE/FOOTING.
13- ENCLOSURE FOOTPRINT.
14- SEALANT AT ENCLOSURE BASE.
15- SEE FULL BOX DETAIL.
16- DIRECT BURIAL CONTROL WIRES IN CONDUIT ON CONTINUED RUN TO REMOTE CONTROL VALVES.

NOTE:
A. DETAIL FOR ILLUSTRATION OF GENERAL CONDITIONS ONLY. CONTROLLER ASSEMBLY SHALL BE COMPLETED WITH SPECIFIED OPTIONS BY UNITED GREENTECH. NEMA 3R. RAINPROOF (UL LISTED).
B. CONTRACTOR SHALL FOLLOW MANUFACTURERS INSTRUCTIONS FOR MOUNTING & GROUNDING. POWER SHALL BE PROVIDED BY OTHERS (SEE ELECTRICAL AND/OR ARCHITECTURAL DRAWINGS).
C. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONNECTION OF POWER TO THE CONTROLLER IN COMPLIANCE TO ALL GOVERNING CODES.

B CONTROLLER WITH STAINLESS STEEL ENCLOSURE

SECTION - NO SCALE

C_TOP-DIG.-CON.dwg

1- FLOW SENSOR
2- SENSOR WIRE LEADS
3- COMMUNICATION CABLE- COIL W/ 4' EXTRA WIRE.
4- WATER PROOF CONNECTORS.
5- PVC PRESSURE MAIN SIZED EQUAL TO SENSOR FOR REQUIRED LENGTH.
6- REQUIRED DISTANCE FROM ANY FITTING OR HARDWARE.
7- REDUCING FITTING OR HARDWARE.
8- PVC PRESSURE MAIN SIZED PER PLAN.
9- 3" PVC CLASS 315 ACCESS SLEEVE.
10- RECTANGULAR VALVE BOX
11- BRICK OR BLOCK SUPPORTS- ONE AT EACH CORNER
12- PEA GRAVEL SUMP 3" DEEP.
13- AT FINISH GRADE IN TURF, 1" IN SHRUB AREA.
14- UNDISTURBED OR COMPACTED SUBGRADE.

NOTE:
A. FOLLOW MANUFACTURERS DIRECTIONS FOR CORRECT INSTALLATION.
B. NO SIZE OR DIRECTION CHANGE WITHIN 10x PIPE DIAMETER UPSTREAM AND 5x PIPE DIAMETER DOWNSTREAM OF SENSOR.
C. COMMUNICATION CABLE SHALL BE TWO CONDUCTOR, SHIELDED CABLE AEP 4516-2SP CONNECTION TO TRANSMITTER.
D. ACCESS SLEEVE FLARED-OUT TO SIT ON PVC PRESSURE PIPE.
E. R. W. WARNING TAG PER SPECIFICATIONS.

D FLOW SENSOR

SECTION - NO SCALE

1- MASTER CONTROL VALVE.
2- WATERPROOF WIRE SPLICE.
3- 14"X20" REC. JUMBO VALVE BOX. W/PURPLE LOCKING LID
4- CONTROL WIRES- STATION WIRE AND COMMON
5- PVC SCH 40 ELECT. CONDUIT FROM FULL BOX OR CONTROLLER/SATELLITE.
6- PVC SCH 80 NIPPLE -TOE- L.A.R.
7- PVC SCH 80 NIPPLE -TBE- L.A.R.
8- PVC SCH 80 45DEG. ELL -TYP 4X.
9- PVC SCH 80 FEMALE ADAPTER.
10- PVC PRESSURE PIPE FOR MOV
11- PVC SCH 80 UNION -VALVE SIZE- WITH REDUCING BUSHING IF REQUIRED.
12- BRICK OR CONCRETE SUPPORTS- ONE AT EACH CORNER
13- PEA GRAVEL SUMP, 3" DEEP MIN.
14- UNDISTURBED/COMPACTED SUBGRADE.
15- FLUSH IN TURF, 1" IN GROUNDCOVER.

NOTES:
A. VALVE BOX LID SHALL BE BRANDED AS SHOWN IN VALVE BOX INSTALLATION AND IDENTIFICATION DETAIL DRAWING. IF USING R.W. WATER, BOX SHALL BE PURPLE WITH PURPLE LOCKING LID.
B. CONTRACTOR SHALL INCLUDE A CHRISTY'S R.W. WARNING TAG AND IRRIGATION I.D. TAG INDICATING CONTROLLER AND MASTER CONTROL VALVE. TAGS SHALL BE ATTACHED TO VALVE BONNET BOLT.
C. MAINLINE FROM TEST STATION.
D. MAINLINE TO FLOW SENSOR.

14- PEA GRAVEL SUMP, 3" DEEP MIN.
15- UNDISTURBED/COMPACTED SUBGRADE.
16- FLUSH IN TURF, 1" IN GROUNDCOVER.
17- SPARE STATION WIRES LOOPED INTO EACH VALVE BOX ON RUN.

NOTES:
A. VALVE BOX LID SHALL BE BRANDED AS SHOWN IN VALVE BOX INSTALLATION AND IDENTIFICATION DETAIL DRAWING.
B. CONTRACTOR SHALL INCLUDE A CHRISTY'S R.W. WARNING TAG AND IRRIGATION I.D. TAG INDICATING CONTROLLER AND STATION NUMBER. TAGS SHALL BE ATTACHED TO VALVE BONNET BOLT.

H REMOTE CONTROL VALVE

SECTION - NO SCALE

V_RCV-RK.dwg

THE PROJECT

1. THIS PROJECT INCLUDES MANY SMALL PLANTING AREAS ADJACENT TO BUILDINGS, PEDESTRIAN WALKS AND ASPHALT PAVING. IN THE INTEREST OF PUBLIC SAFETY, PROPERTY PRESERVATION AND WATER CONSERVATION IRRIGATION METHODS IN THESE AREAS EMPLOY TECHNIQUES AND EQUIPMENT TO CONTROL THE 'RADIUS-OF-THROW' OF SHORT RADIUS SPRINKLERS. IN SOME LANDSCAPE AREAS DRIP IRRIGATION METHODS AND EQUIPMENT ARE USED.

2. ALL IRRIGATION SYSTEMS DESCRIBED BY THESE PLANS ARE INTENDED FOR USE OF RECYCLED WATER. ALL SYSTEMS INTENDED FOR RECYCLED WATER DISTRIBUTION SHALL BE INSTALLED ACCORDING TO THE RULES AND REGULATIONS OF LOCAL GOVERNING AGENCIES. WHILE THESE SYSTEMS ARE TO BE SERVED WITH RECYCLED WATER ALL IRRIGATION INSTALLATIONS SHALL BE DOWNSTREAM OF AN APPROVED REDUCED PRESSURE TYPE BACKFLOW PREVENTION DEVICE. THE CONTRACTOR SHALL VERIFY THAT ALL CONNECTIONS ARE DOWNSTREAM OF A REDUCED PRESSURE TYPE BACKFLOW PREVENTION DEVICE. BACKFLOW PREVENTION DEVICE SHALL BE TESTED BY A CERTIFIED TECHNICIAN AT THE EXPENSE OF THE CONTRACTOR. TEST CERTIFICATION SHALL BE DOCUMENTED WITH THE LANDSCAPE ARCHITECT.

4. USE OR FUTURE POTENTIAL USE OF RECYCLED WATER REQUIRES THAT ALL PIPE, SLEEVES, SPRINKLER HEADS, REMOTE CONTROL VALVES, QUICK COUPLER VALVES AND VALVE BOXES BE IDENTIFIED AS CONTAINING RECYCLED WATER. ALL INSTALLATIONS SHALL BE ACCORDING TO REQUIREMENTS OF THE SERVING WATER DISTRICT AND ALL OTHER CODES AND ORDINANCES AFFECTING CONSTRUCTION WITH OR USE OF RECYCLED WATER.

5. INSTALLATION OF DRIP IRRIGATION REQUIRES THE CONTRACTOR TO OBTAIN TECHNICAL ASSISTANCE FROM THE IRRIGATION MANUFACTURER, THE LANDSCAPE ARCHITECT AND/OR THE IRRIGATION CONSULTANT. A PRE-CONSTRUCTION MEETING WITH THE MANUFACTURER AND LANDSCAPE ARCHITECT AND SITE OBSERVATIONS PRIOR TO BACKFILL OF DRIP SYSTEMS IS MANDATORY.

6. IT IS THE RESPONSIBILITY OF THE LANDSCAPE CONTRACTOR TO ARRANGE FOR AND SCHEDULE THE PRE-CONSTRUCTION MEETING AND ADHERE TO THE SPECIFICATIONS REGARDING THE SCHEDULE OF SITE OBSERVATIONS.

7. UNOBSERVED, UNPROVED, INADEQUATE INSTALLATIONS ARE THE SOLE RESPONSIBILITY OF THE INSTALLING CONTRACTOR AND WILL BE SUBJECT TO REMOVAL AND REINSTALLATION WITH NEW MATERIAL AT NO ADDITIONAL COST TO THE BUILDER/OWNER.

8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ANY AND ALL RECONNAISSANCE WORK REQUIRED TO COMPLETE THE INTENT OF THE DRAWINGS. TO INTERFACE WITH ALL EXISTING CONDITIONS THE CONTRACTOR MUST BECOME VERY FAMILIAR WITH THESE CONDITIONS. THE CONTRACTOR SHALL COORDINATE ALL WORK AFFECTED BY EXISTING CONDITIONS WITH APPROPRIATE ON-SITE PERSONNEL.

9. ALL LOCAL, MUNICIPAL AND STATE LAWS, RULES AND REGULATIONS GOVERNING OR RELATING TO ANY PORTION OF WORK DESCRIBED AND/OR DIRECTED BY THESE DRAWINGS ARE HEREBY INCORPORATED INTO AND MADE A PART OF THESE SPECIFICATIONS. THE CONTRACTOR SHALL PERFORM WORK ACCORDING TO PROVISIONS OF ALL GOVERNING LOCAL, MUNICIPAL AND STATE LAWS, RULES AND REGULATIONS.

10. THE CONTRACTOR SHALL OBTAIN, STUDY AND COORDINATE ALL PERTINENT ENGINEERING AND/OR ARCHITECTURAL PLANS AND SPECIFICATION AND COORDINATE WITH WORK DESCRIBED BY THESE PLANS.

11. THE CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS REQUIRED TO PERFORM WORK DESCRIBED BY THESE PLANS BEFORE BEGINNING WORK.

12. IRRIGATION PLANS ARE DIAGRAMMATIC. ALL EQUIPMENT SHOWN IN PAVED AREAS OR WITHIN BUILDINGS IS FOR CLARITY OF PLANS ONLY. ALL INSTALLATION DIRECTED BY THESE PLANS SHALL BE WITHIN PLANTING AREAS.

WATER SOURCE

1. METER AND SERVICE SHALL BE PROVIDED BY OTHERS.
SYSTEM P.O.C.'S SHALL DOWNSTREAM OF THE DEDICATED IRRIGATION WATER METER. THE CONTRACTOR SHALL CONNECT TO THE DOWNSTREAM SIDE OF THE METER AND EXTEND THE SYSTEM AS SHOWN. THESE SYSTEMS ARE INTENDED TO BE SERVED WITH RECYCLED WATER AND MUST BE INSTALLED ACCORDING TO THE RULES AND REGULATIONS ESTABLISHED BY LOCAL AND STATE AGENCIES GOVERNING USE OF THIS RESOURCE.

2. EXISTING STATIC PRESSURE AT POINTS OF CONNECTION SHALL BE APPROXIMATELY 75 PSI. THIS INFORMATION WAS OBTAINED FROM THE

3. THE IRRIGATION SYSTEM IS DESIGNED TO OPERATE AT 30 TO 40 PSI. APPROXIMATELY 74 PSI IS REQUIRED AT THE POINT OF CONNECTION.

4. THE CONTRACTOR SHALL VERIFY THE WATER PRESSURE IN THE FIELD PRIOR TO PURCHASE OF ANY EQUIPMENT AND PERFORMING ANY INSTALLATIONS. IF THE PRESSURE IS NOT AS STATED ABOVE, THE CONTRACTOR SHALL CONTACT THE LANDSCAPE ARCHITECT FOR INSTRUCTIONS BEFORE PROCEEDING. PROCUREMENT AND/OR INSTALLATION OF ANY IRRIGATION EQUIPMENT WITHOUT VERIFICATION OF SATISFACTORY WATER PRESSURE SHALL BE AT THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

GENERAL

1. PLANS ARE DEVELOPED OVER BASE INFORMATION PROVIDED BY THE LANDSCAPE ARCHITECT AND CIVIL ENGINEER. THE DRAWINGS ARE DIAGRAMMATIC. THE SCALE OF THE PLANS SOMETIMES MAKES IT NECESSARY TO SHOW IRRIGATION PIPELINES WITHIN THE BUILDINGS, WALKS OR OTHERWISE OUTSIDE OF THE PLANTING AREAS. THIS IS ONLY FOR CLARITY OF THE PLANS. ALL IRRIGATION EQUIPMENT SHALL BE INSTALLED IN PLANTER AREAS WHEREVER POSSIBLE. IN THE FOLLOWING PLANS THE IRRIGATION MAINLINE IS OFTEN SHOWN IN THE WALKWAY. IT IS TO BE INSTALLED 12" TO 18" FROM FACE OF WALKWAY WITHIN THE PLANTING AREA. ALTHOUGH VALVE LOCATIONS ARE SHOWN DIAGRAMMATIC ALLY, THEY ARE INTENDED TO BE INSTALLED OUT OF SIGHT. LOCATION OF ALL VALVE ASSEMBLIES WITH VALVE BOXES SHALL BE STAKED FOR APPROVAL BY LANDSCAPE ARCHITECT PRIOR TO INSTALLATION.

2. UNLESS OTHERWISE SPECIFIED ON THE PLANS:
* ALL LATERAL END RUNS ARE TO BE 3/4"
* ALL SUB-MAINS (NON-PRESSURE LINE CONNECTED DIRECTLY DOWNSTREAM OF THE REMOTE CONTROL VALVE) SHALL BE ONE SIZE LARGER THAN THAT REMOTE CONTROL VALVE.
* MAINLINE END RUNS ARE TO BE 1 1/2".
* ALL PIPE SHALL BE DOWN SIZED IN DIRECTION OF FLOW ONLY.

3. THIS PROJECT INCLUDES VERY CONFINED PLANTING AREAS. OVER-SPRAY IS NOT ACCEPTABLE. THE CONTRACTOR SHALL UTILIZE PRESSURE COMPENSATING SCREENS WHERE SPECIFIED, NOTED ON THE DRAWINGS OR WHERE NECESSARY AND ADJUST RADIUS OF SPRAY TO PREVENT OVER-SPRAY BEYOND INTENDED AREAS OF COVERAGE.

4. THE CONTRACTOR SHALL NOT INSTALL THE IRRIGATION SYSTEM AS SHOWN ON THE PLANS WHEN IT IS OBVIOUS THAT FIELD CONDITIONS SUCH AS OBSTRUCTIONS, GRADING DIFFERENCES OR DIFFERENCES IN SIZE AND SHAPE OF THE PLANTED AREAS MAY NOT HAVE BEEN ACCOMMODATED IN THE ORIGINAL DESIGN. THE CONTRACTOR SHALL NOTIFY THE LANDSCAPE ARCHITECT OF SUCH CHANGE IN FIELD CONDITIONS. IF NOTIFICATION IS NOT PERFORMED, THE CONTRACTOR SHALL BE FULLY RESPONSIBLE FOR THE INSTALLATION AND FOR ANY NEED OF SUBSEQUENT REVISIONS.

6. ALL EQUIPMENT SHALL BE INSTALLED AS DETAILED. USE TEFLON TAPE ON MALE THREADS OF ALL THREADED CONNECTIONS.

7. ALL SPRINKLER HEADS ADJACENT TO PEDESTRIAN WALKS, CURBS, ROADS, IN AND ADJACENT TO TURF AREAS SHALL BE POP/UP TYPE SPRINKLERS AS LISTED IN THE LEGEND AND AS INDICATED ON THE PLANS.

8. ALL SPRINKLER HEADS SHALL BE SET PERPENDICULAR TO FINISH GRADE, WITH THE EXCEPTION OF SLOPE CONDITIONS WHERE HEAD SHALL BE SET BETWEEN PLUMB AND NORMAL TO SLOPE. ALL SPRINKLER HEADS SHALL BE SET AT HEIGHT AS SHOWN IN THE DETAIL DRAWINGS.

9. IN CASE OF POSSIBLE CONTROL WIRE FAILURE THE CONTRACTOR SHALL INSTALL TWO SPARE CONTROL WIRES FROM THE CONTROLLER TO THE FARTHEST VALVE ON EACH LEG OF THE MAINLINE. THESE WIRES SHALL PASS THROUGH ALL VALVE BOXES ALONG THE MAINLINE ROUTE. THESE WIRES SHALL BE A DIFFERENT COLOR FROM OTHER CONTROL WIRES AND BE LABELED AS SPARE AT THE CONTROLLER CABINET, IN THE VALVE BOX OF THE FARTHEST VALVE AND ALL OTHER VALVE BOXES. SEE SUPPLEMENTAL SPECIFICATIONS.

10. CONTRACTOR SHALL VERIFY LOCATION OF ALL UNDERGROUND UTILITIES WITHIN WORK AREA PRIOR TO START OF CONSTRUCTION. AT LEAST TWO WORKING DAYS PRIOR TO EXCAVATION, THE CONTRACTOR SHALL REQUEST MARK OUT OF UNDERGROUND UTILITIES BY CALLING THE REGIONAL NOTIFICATION CENTER FOR AN INQUIRY IDENTIFICATION NUMBER.
THE CONTRACTOR SHALL ALSO REFER TO ALL OTHER IMPROVEMENT PLANS FOR THIS PROJECT FOR UTILITY LOCATIONS.

MEANS AND METHODS

IRRESPECTIVE OF ANY OTHER TERM IN THESE CONSTRUCTION DOCUMENTS, THE IRRIGATION CONSULTANT SHALL NOT CONTROL OR BE RESPONSIBLE FOR CONSTRUCTION MEANS, METHODS, TECHNIQUES, SCHEDULES, SEQUENCES OR PROCEDURES; OR FOR CONSTRUCTION SAFETY OR ANY OTHER RELATED PROGRAMS; OR FOR ANOTHER PARTIES' ERRORS OR OMISSIONS OR FOR ANOTHER PARTIES' FAILURE TO COMPLETE THEIR WORK OR SERVICES IN ACCORDANCE WITH IRRIGATION CONSULTANT'S DOCUMENTS.

PROJECT MAINTENANCE

A LACK OF MAINTENANCE OR IMPROPER MAINTENANCE IN AREAS SUCH AS OR ASSOCIATED WITH, BUT NOT LIMITED TO, LANDSCAPE PLANTING, HARDSCAPE, LIGHTING, GRADING, DRAINAGE, WATER FEATURES, FURNISHINGS, AND IRRIGATION OR WATER MANAGEMENT WHETHER ASSOCIATED WITH THE PROJECT OR NOT MAY RESULT IN DAMAGE TO PROPERTY OR PERSONS.
THE CONTRACTOR ACKNOWLEDGES AND AGREES THAT PROPER PROJECT MAINTENANCE IS REQUIRED AFTER THE PROJECT IS COMPLETE AND TO INFORM THE OWNER OF HIS/HER SOLE RESPONSIBLE FOR THE RESULTS OF ANY LACK OF MAINTENANCE OR IMPROPER MAINTENANCE.

IRRIGATION EQUIPMENT LEGEND

SYMBOL	DESCRIPTION	MANUFACTURER / MODEL	REMARKS	DETAIL
C	IRRIGATION CONTROLLER FOR CONTROL OF THE SITE	RAINBIRD ESP-MC WITH GREENTECH OPTIONS AS INDICATED BY MODEL NUMBER WITHIN STAINLESS STEEL ENCLOSURE	SEE PLAN SHEETS FOR MODEL NUMBER, STATION COUNT AND OPTIONS. CONTROLLER TO BE OBTAINED FROM AND ASSEMBLED BY GREEN TECH. (800) 427-0774. CONTRACTOR SHALL INSTALL PER MANUFACTURERS INSTRUCTIONS AND MAKE CONNECTIONS PER GOVERNING CODES AND ORDINANCE.	B
F	FLOW SENSOR	DATA INDUSTRIAL VB-JMBP AND VB-JMB-6EXT-B VALVE BOX	FOR USE WITH THE EMERGENCY SHUT-OFF FEATURES OF THE CONTROLLER ASSEMBLY (2"SIZE) SIZED AS NOTED ON THE PLAN SHEETS.	DL

CONTROLS

1. SYSTEMS OF THIS PROJECT ARE CONTROLLED BY SOLID STATE IRRIGATION CONTROLLERS. THE CONTRACTOR SHALL EXERCISE STRICT COMPLIANCE WITH THE MANUFACTURERS' INSTRUCTIONS FOR PROPER GROUNDING, INSTALLATION AND USE.

2. CONTROLLER LOCATIONS ARE SHOWN DIAGRAMMATICALLY. FINAL LOCATION TO BE APPROVED BY THE OWNER'S REPRESENTATIVE. POWER FOR THE IRRIGATION CONTROLLERS SHALL BE PROVIDED BY THE OWNER, LOCATED APPROXIMATELY WHERE SHOWN ON THE DRAWINGS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR INSTALLATION OF THE IRRIGATION CONTROLLERS AND CONNECTION TO THE POWER SOURCE IN COMPLIANCE WITH ALL GOVERNING CODES.

3. TO PREVENT UNNECESSARY IRRIGATION RAIN SENSING DEVICES ARE USED TO GIVE INDICATION OF SUBSTANTIAL RAINFALL.

FOR TECHNICAL ASSISTANCE CONTACT THE MANUFACTURERS REPRESENTATIVES AS FOLLOWS:
CONTROLLERS - GREEN TECH (800)-427-0774
SUBSURFACE DRIP IRRIGATION - TORO (800)-664-4740

DRIP IRRIGATION

1. THE CONTRACTOR MUST BE QUALIFIED TO INSTALL DRIP IRRIGATION EQUIPMENT AND MUST ARRANGE AND SCHEDULE A PRE-CONSTRUCTION MEETING WITH BOTH THE LANDSCAPE ARCHITECT AND THE DRIP EQUIPMENT MANUFACTURER PRIOR TO ANY INSTALLATIONS.

2. THE CONTRACTOR SHALL PRACTICE CAUTION WHEN INSTALLING DRIP IRRIGATION EQUIPMENT. ALL MANUFACTURERS ILLUSTRATIONS, DIRECTIONS, INSTRUCTIONS, RECOMMENDATIONS, WRITTEN LITERATURE AND VIDEO TAPE ILLUSTRATIONS SHALL BE FOLLOWED.

3. PVC SHAVINGS AND BURRS WILL NOT BE TOLERATED IN THE SYSTEM. ALL PVC PIPE SHALL BE CUT WITH THE APPROPRIATE PVC PIPE CUTTERS. USE OF ANY TYPE OF SAW FOR CUTTING PVC PIPE IS NOT ACCEPTABLE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL DEBRIS INTRODUCED INTO THE SYSTEM DURING CONSTRUCTION AND SUBSEQUENT MAINTENANCE PERIOD.

1- BALL VALVE ONE SIZE LARGER THAN FILTER. W/REDUCING BUSHINGS.
2- 3/4" OR 1" DISC FILTER SEE NOTES FOR SIZING.
